

Emily

The Brainy Underdog

Backstory

Emily is a 24-year old heterosexual female. She is a PHD graduate student and academic researcher (studying Kinesiology and Physical Education) at the university in Middleburg. Her research focuses on physical factors, such as exercise, sleep, diet, etc. She has a middle-class background; her parents are together, and are supportive of her work, as they are both academics as well.

Personality Traits

Emily is extremely intelligent and sees the world through her brain. She is dedicated to her work, with a deep conviction for her own views. She is compassionate, and sometimes shows her playful side. Within the dynamics of the research team, she is an underdog worth rooting for. However, she tends to over-intellectualize. She is reactive and panicky, and allows herself to be overwhelmed easily. She lets the others get the better of her, and can be an awkward speaker.

Development

As the story progresses, Emily is panicky at the obstacles in their way, and looks to Patricia for guidance. Once she gathers her wits, she seeks rational solutions. She is bothered by her rivalry with Lauren, but not afraid to assert her own views. Her inexperience with men displays itself as she begins to interact with Lewis. She rationalizes to herself that romance is unnecessary for personal fulfillment -- intellectual pursuit is all that is needed. She gradually falls in love with Lewis, and comes to accept this love as a new avenue for personal fulfillment.

Key Relationships

- **Patricia, Lauren, Alex:** Strong friendship and camaraderie with the other researchers
- **Lauren:** Friendly but heated rivalry
- **Lewis:** A like-minded worrier, and eventual love interest
